Plant and Soil **133**: 305–307, 1991.

Contents of Volume 133 1991

Volume 133, No. 1

Editorial: Henk Arnold leaves *Plant and Soil* vi
M. Arshad and W. T. Frankenberger, Jr., Microbial production of plant hormones 1
Z. Singh, B. S. Dhillon and C. L. Arora, Nutrient levels in malformed and healthy tissues of mango (*Mangifera indica* L.) 9
M. R. Davis, The comparative phosphorus requirements of some temperate perennial legumes 17
K. Sall and T. R. Sinclair, Soybean genotypic differences in sensitivity of symbiotic nitrogen fixation to soil dehydration 31
J. Bañuls, F. Legaz and E. Primo-Millo, Salinity-calcium interactions on growth and ionic concentration of Citrus plants 39
L. Nesheim and B. C. Boller, Nitrogen fixation by white clover when competing with grasses at moderately low temperatures 47
L. Johnsson, Selenium uptake by plants as a function of soil type, organic matter content and pH 57
J. van den Ende, Supersaturation of soil solutions with respect to gypsum 65
A. F. M. Olsthoorn, W. G. Keltjens, B. van Baren and M. C. G. Hopman, Influence of ammonium on fine root development and rhizosphere pH of Douglas-fir seedlings in sand 75
E. S. Jensen, Evaluation of automated analysis of ^{15}N and total N in plant material and soil 83
B. Åström, Role of bacterial cyanide production in differential reaction of plant cultivars to deleterious rhizosphere pseudomonads 93
M. B. Weber, H. Schat and W. M. ten Bookum-van der Maarel, The effect of copper toxicity on the contents of nitrogen compounds in *Silene vulgaris* (Moench) Garcke 101
A. A. Meharg and K. Killham, A novel method of quantifying root exudation in the presence of soil microflora 111
R. A. Dahlgren, K. A. Vogt and F. C. Ugolini, The influence of soil chemistry on fine root aluminum concentrations and root dynamics in a subalpine Spodosol, Washington State, USA 117
P. Hebbar, O. Berge, T. Heulin and S. P. Singh, Bacterial antagonists of Sunflower (*Helianthus annuus* L.) fungal pathogens 131
S. Gaind and A. C. Gaur, Thermotolerant phosphate solubilizing microorganisms and their interaction with mung bean 141

Volume 133, No. 2

J. Ma and E. Takahashi, Effect of silicate on phosphate availability for rice in a P-deficient soil 151
P. G. Krannitz, L. W. Aarssen and D. D. Lefebvre, Correction for non-linear relationships between root size and short term Pi uptake in genotype comparisons 157
P. G. Krannitz, L. W. Aarssen and D. D. Lefebvre, Relationships between physiological and morphological attributes related to phosphate uptake in 25 genotypes of *Arabidopsis thaliana* 169
C. Hamel, V. Furlan and D. L. Smith, N_2-fixation and transfer in a field grown mycorrhizal corn and soybean intercrop 177
P. R. Darah, Models of the rhizosphere. I. Microbial population dynamics around a root releasing soluble and insoluble carbon 187
N. Sanginga, G. D. Bowen and S. K. A. Danso, Intra-specific variation in growth and P accumulation of *Leucaena leucocephala* and *Gliricidia sepium* as influenced by soil phosphate status 201
J. G. Buwalda and G. S. Smith, Influence of anions on the potassium status and productivity of kiwifruit (*Actinidia deliciosa*) vines 209
T.-H. Lin, S.-B. Ho and K.-H. Houng, The use of iron oxide-impregnated filter paper for the extraction of available phosphorus from Taiwan soils 219
I. J. Bingham and I. P. Cumbus, Influence of root temperature on the potassium requirements of young tomato plants 227
J. E. Fernández, F. Moreno, F. Cabrera, J. L. Arrue and J. Martín-Aranda, Drip irrigation, soil characteristics and the root distribution and root activity of olive trees 239
G. F. Craig, C. A. Atkins and D. T. Bell, Effect of salinity on growth of four strains of Rhizobium and their infectivity and effectiveness on two species of Acacia 253
L. Dunemann, N. von Wirén, R. Schulz and H. Marschner, Speciation analysis of nickel in soil solutions and availability to oat plants 263
J. B. Friedericks, C. Hagedorn and R. B. Reneau, Evaluation of African annual clovers to moisture stress in two Ethiopian highland soils 271
S. Satawathananont, W. H. Patrick Jr. and P. A. Moore Jr., Effect of controlled redox conditions on metal solubility in acid sulfate soils 281

Short communications

H. Vierheilig and J. A. Ocampo, Receptivity of various wheat cultivars to infection by VA-mycorrhizal fungi as influenced by inoculum potential and the relation of VAM-effectiveness to succinic dehydrogenase activity of the mycelium in the roots 291
J. G. Paull, A. J. Rathjen and B. Cartwright, Tolerance to high concentrations of boron for the amphiploid of *Triticum aestivum* × *Agropyron elongatum* 297
